

FOOD DEHYDRATOR

This small appliance is simply great!

For a gentle dehydrating & preserving of foods

ROMMELSBACHER

To complete our series of stainless steel food dehydrators, we can now also offer a smaller version, the model DA 650. It is small on the outside and large on the inside! With its compact outside dimensions, it offers a dehydration area of 0.5 m² on the inside. It is perfect for preparing traditional dehydration recipes with fruit, vegetables, and herbs, as well as the latest trend foods such as beef jerky, fruit leather or vegetable chips, even in a small household. Time and temperature can be adjusted to the food in question. Operation is also as easy as pie. For gentle dehydration, a fan inside the appliance ensures even heat distribution and moisture removal. Vitamins, minerals, and fibre are largely preserved. The results are 100 % natural, without additives or preservatives. Whether the small, full-size or XXL model – our food dehydrators are perfect for a consciously healthy diet!
